

BUILD PROPOSAL

Integrilex website

PREPARED FOR

Integrilex

PREPARED BY

Plain Sight

Overview

Integrilex is a Toronto law firm. Most of its clients come through referrals, and they often look the firm up online before they call. Plain Sight will build a new website for Integrilex that leaves those visitors feeling the firm understands what they are going through, has the experience to protect them, and is easy to talk to: calm and warm, written in plain English, and polished enough to show an established practice.

The website

The website will have four or five pages, depending on how the final copy is arranged. The working list is:

- **Home.** What the firm does and who it helps, with links into the rest of the site.
- **About.** The lawyers, their backgrounds, and the languages the firm works in.
- **Areas of practice.** The firm's practice areas, each with a short summary and a fuller description.
- **Contact.** A contact form, phone number, email address and office address.

Deliverables

- The pages listed above, with layouts for phones, tablets and computers
- A design for the site, based on Integrilex's logo and brand colours, with up to two rounds of revisions. If Integrilex has no design references to share, Plain Sight will propose two directions for the home page to choose from.

- Integrilex's content structured, formatted and placed on the pages, with an editing pass for consistency
- A contact form, with each enquiry sent to Integrilex by email
- Search setup on every page, so the site is indexed and appears when someone searches for Integrilex by name
- Testing across browsers, phones and tablets before launch
- Publishing the site and connecting it to Integrilex's domain
- Written feedback on the tone and structure of Integrilex's draft copy

03

Pricing

Integrilex can pay for the website in one of two ways: a one-time payment for the website, split between signing and launch, followed by a monthly maintenance plan; or a fixed monthly subscription with nothing to pay before launch.

The website

One-time payment

\$2,500

one time

Half on signing, half at launch

- The website, paid in two instalments
- From launch, one of the two maintenance plans below

Monthly subscription

\$200

per month

Nothing to pay before launch

- The website and everything in the Essential plan
- 12-month minimum, then month to month

If Integrilex cancels the subscription before the 12 months are up, the difference between what has been paid and the \$2,500 website price is due.

Maintenance plans

With the one-time payment, the site runs on one of two monthly plans from launch, each with a 12-month minimum and then month to month.

Essential	\$50 per month
Hosting and care, with changes billed by time	
• Hosting, backups, monitoring and site statistics • Changes billed by time: \$25 for the first 15 minutes, then \$22.50 for each further 15 minutes • Each change quoted before work starts and added to the next monthly bill	
Retainer	\$250 per month
Everything in Essential, plus:	
• Unlimited small and medium changes, one request at a time • Two hours of development work a month for larger work such as a new page. Unused hours carry over for 30 days. • A reply within one business day, and each change completed within five business days	

A change is one edit to one page. The Retainer plan includes all small and medium changes:

- **Small:** a text edit on one page, swapping in a supplied photo, updating hours or contact details, or adding a downloadable file such as a PDF.
- **Medium:** a new section on an existing page, or reorganizing the content of a page.
- **Large:** a new page, a new page layout, or anything that needs new design. On the Retainer plan, large changes use the development hours. Work beyond those hours, and large changes on the Essential plan, are billed at \$90 an hour.

Optional add-ons

Add-ons are one-time fees, available under either payment option, and chosen at the start of the project.

Spanish version, \$400. The whole site in Spanish, with a language switch in the header and search setup for each language. Plain Sight translates it with AI, and Integrilex reviews the translation before launch.

Italian version, \$200. The whole site in Italian as well, added alongside the Spanish version and reviewed the same way.

Photography brief and mood board, \$300. Reference images and an aesthetic direction for the site's photographs, with a written brief for the photographer or for Integrilex: the shots needed, the setting and light that suit the design, and the image sizes the site uses.

04

Timeline

The website will take two to three weeks from kickoff to launch, depending on how quickly each review comes back.

Assumptions

- Integrilex sends the written content, photographs and logo files by kickoff. The timeline starts once they are in hand.
- Integrilex names one person to give feedback and approvals, and replies to each review within two business days.
- Feedback for each review is sent together as one list.
- With kickoff by October 13, the site will launch between October 27 and November 3, ahead of the office event on November 10. If the new photographs are not ready by kickoff, the site will launch with the best of the current photographs, and Plain Sight will swap in the new ones at no additional cost.

Plain Sight Dashboard

Plain Sight Dashboard is the website management platform Plain Sight uses to host and maintain the sites it builds.

Every website needs hosting to stay online. With Plain Sight, that hosting runs through the dashboard, and Integrilex pays for it through its maintenance plan or subscription. Plain Sight keeps the site online, backed up, monitored and up to date, and Integrilex gets the tools to see how the site is doing and to manage it day to day:

- **Statistics.** How many people visited the site, where they came from, and which pages they read.
- **Inbox.** Every message sent through the contact form, kept in one place as well as arriving by email.
- **Changes.** A short form for asking Plain Sight to change something on the site, with the status of each request until it is live. Small and medium changes are included on the Retainer plan.
- **Billing.** Invoices, payments and the current plan.

Integrilex signs in with a link sent by email, with no password to remember.

Payment terms

- Paying a year in advance gets two months free on the Essential and Retainer plans.
- Add-ons are billed half on signing and half at launch.
- Integrilex owns its domain name, registers it in its own name and pays for it directly.
- Invoices are payable within 15 days. Prices are in Canadian dollars and do not include tax.

Not included

- **Writing the content.** Integrilex provides the written content. Plain Sight edits it for consistency and places it on the pages.
- **Photography and video production.** Integrilex provides photographs and any video.
- **Logo and brand design.** The site uses Integrilex's existing logo.
- **Ongoing search work.** The site is set up to be found by name. Work to rank for broader search terms is separate.
- **Professional translation.** The Spanish and Italian add-ons use AI translation, which Integrilex reviews before launch.
- **Law Society of Ontario review.** Checking the site's content against the Law Society's marketing rules stays with Integrilex.

Next steps

On acceptance, Plain Sight will send the agreement for the chosen payment option, along with the content checklist.
